Things to keep in mind:
1. Classical music NEVER uses chord diagrams.
2. You will notice that chords can have the same name but use different notes - these are know as "voicings".
3. Don't just grab any chord - study the chord diagrams and read the notes!
4. Practice slowly until you can move from one chord to another smoothly.
5. A triplet is 3 notes in the space of 2, count it as "one-trip-let, two-trip-let, three-trip-let, four-trip-let".
