**Subject:** EE power class

Hi Laura - Based on Fon's emails the EE program does not intend to actually use our power lab equipment, just the lab space itself as a place to do a couple of their labs. As such I have no issues with equipment costs, lab fees, sharing equipment, etc.. I also have no objections to a more theoretical EE power class.

With our lab running in the evening in fall, running their lab In spring should make the scheduling easier. However, I really don't know where the power lab will be located when building four is demolished because there were no plans made to relocate any of the building 4 labs anywhere, even on a temporary basis. We are working on locations, but with so much in the air I cannot promise conflict free scheduling of the space. That said, I do think we will be able to work out the details to everyone's satisfaction.
